

RAHUL PRASAD

React.js · Next.js · Flutter Developer

Bhopal, M.P., India | rahulprasad5943@gmail.com | +91 7024645080

PROFESSIONAL SUMMARY

React.js, Next.js, and Flutter Developer with 4+ years of experience building scalable, high-performance web and mobile applications. Proven expertise in component architecture, server-side rendering (SSR/SSG), state management with Redux Toolkit, and cross-platform mobile development. Track record of reducing render times by 75%, boosting SEO Lighthouse scores by 20%, and increasing mobile retention by 20%. Adept at delivering pixel-perfect, responsive UIs and seamless user experiences — from landing pages to complex multi-role platforms.

TECHNICAL SKILLS

Languages: JavaScript (ES2022+), TypeScript

Web Frontend: React.js, Next.js (SSR / SSG / ISR), Redux, Redux Toolkit, RTK Query, React Query

Mobile: Flutter, Dart — Geolocation, Push Notifications, Offline Storage, In-App Purchase, VPN

Styling: Tailwind CSS, MUI (Material UI), ShadCN UI, Bootstrap, Responsive Design

API & State: REST APIs, GraphQL, WebSockets / Socket.IO, Firebase

Auth: JWT, OAuth2, Role-Based Access Control (RBAC)

Performance: Memoization, Code Splitting, Lazy Loading, SSR/SSG/ISR, Caching, Pagination

Tools: Git, GitHub, Bitbucket, Postman, VS Code, Jira

WORK EXPERIENCE

Full Stack Developer – Tech Mahindra

Jul 2023 – Present | 3 years 1 month

- Architected and maintained React.js and Next.js web applications with SSR/SSG, improving Lighthouse SEO scores by 20%.
- Built fully responsive, mobile-first UIs using Tailwind CSS and MUI, improving user engagement by 25%.
- Reduced React component render times by 75% using memoization (useMemo, useCallback, React.memo), lazy loading, and code splitting.
- Developed and maintained cross-platform Flutter apps for iOS and Android with reusable component libraries.
- Implemented complex mobile features — geolocation, push notifications, offline storage, VPN integration, and in-app purchase — increasing offline usage by 20% and retention by 15%.
- Managed application state with Redux Toolkit and RTK Query, cutting redundant API calls and improving data-fetching efficiency.
- Integrated REST APIs and GraphQL endpoints for real-time data handling across web and mobile apps.
- Implemented JWT-based authentication and RBAC on the frontend, reducing access-control issues by 50%.
- Collaborated with design teams to translate Figma mockups into pixel-perfect UIs, boosting user satisfaction by 20%.
- Built reusable component libraries and shared hooks, reducing development time by 15% and bug reports by 30%.

Front End Developer – Infosys

May 2021 – Jun 2023 | 2 years 1 month

- Built and maintained responsive, cross-browser UIs using React.js, HTML5, and CSS3, aligned with Figma design specs.
- Developed reusable React components and integrated REST APIs to power dynamic, data-driven interfaces.
- Collaborated with backend and QA teams in an Agile/Scrum environment to deliver features on schedule.
- Worked with Redux for state management and optimized component rendering for better performance.
- Participated in code reviews and followed best practices for clean, maintainable front-end code.

KEY PROJECTS

Send Love — Donation & Welfare Platform

Tech Stack: Flutter, Next.js, GraphQL Subscriptions, Socket.IO

- Built the complete cross-platform Flutter app for Givers and Receivers with role-based UI flows and navigation.

- Developed the Next.js admin dashboard for Analysts, Observers, and Admins with real-time fund-flow tracking via Socket.IO and GraphQL subscriptions.
- Implemented field-level authorization and role-based access throughout the React and Flutter frontend.
- Designed responsive, accessible UI components with seamless state sync between mobile and web.

POS (Point of Sale) System

Tech Stack: React.js, Redux Toolkit, MUI, Tailwind CSS

- Delivered a real-time inventory management UI with barcode scanning support and live stock update feeds.
- Built role-specific dashboards (cashier, manager, admin) with protected React Router routes and RBAC.
- Managed complex state across the POS flow using Redux Toolkit with optimistic UI updates.

KPMG Stage Gate — Project Lifecycle Management

Tech Stack: React.js, Next.js, RTK Query

- Developed a multi-team project management UI with stage-gate workflows and approval flows using Next.js.
- Optimised data fetching with RTK Query — reduced redundant API calls and improved dashboard load times significantly.
- Implemented SSR for initial page loads to ensure fast time-to-interactive for all stakeholders.

Accounting System — Beej Nigam Warehouse

Tech Stack: React.js, Next.js, GraphQL

- Built the complete frontend for a warehouse accounting system covering inventory ledger, purchase orders, and vendor management.
- Designed reusable React components for complex tabular data, forms, and filter interfaces.

SATOCCHI — E-Commerce Mobile Application

Tech Stack: Flutter, Dart

- Built a cross-platform Flutter app enabling users to scan products via camera and complete secure payments.
- Implemented smooth navigation, cart management, and payment flow with offline-friendly state handling.

Broiler Contract Farming Management System

Tech Stack: Flutter, Next.js, PostgreSQL / Supabase

- Developed a mobile-first farm management platform for broiler contract farming with role-based access for Admin, Supervisor, and Farmer.
- Built farm and batch management screens in Flutter with daily activity tracking, reporting features, and offline-friendly state handling.
- Implemented user authentication and RBAC-protected navigation flows across the Flutter mobile app and Next.js web dashboard.

Aceuss — Healthcare Application

Tech Stack: Flutter

- Built patient management and appointment scheduling screens in Flutter with clean, accessible UI design.

EDUCATION

B.Tech in Computer Science

Maulana Azad National Institute of Technology (MANIT), Bhopal

Sep 2017 – Oct 2021

GPA: 7.4 / 10
